

AI-Powered Legal Clarity for All

Empowering ordinary people to understand and navigate
their legal position with Generative AI.

AI-Powered Legal Application Layer: Clarify and Empower

Secure Document Processing

Users upload documents once. Gen-AI reads, maps issues, cross-references timelines, and applies procedural-fairness logic within an encrypted workspace. No external uploads required.

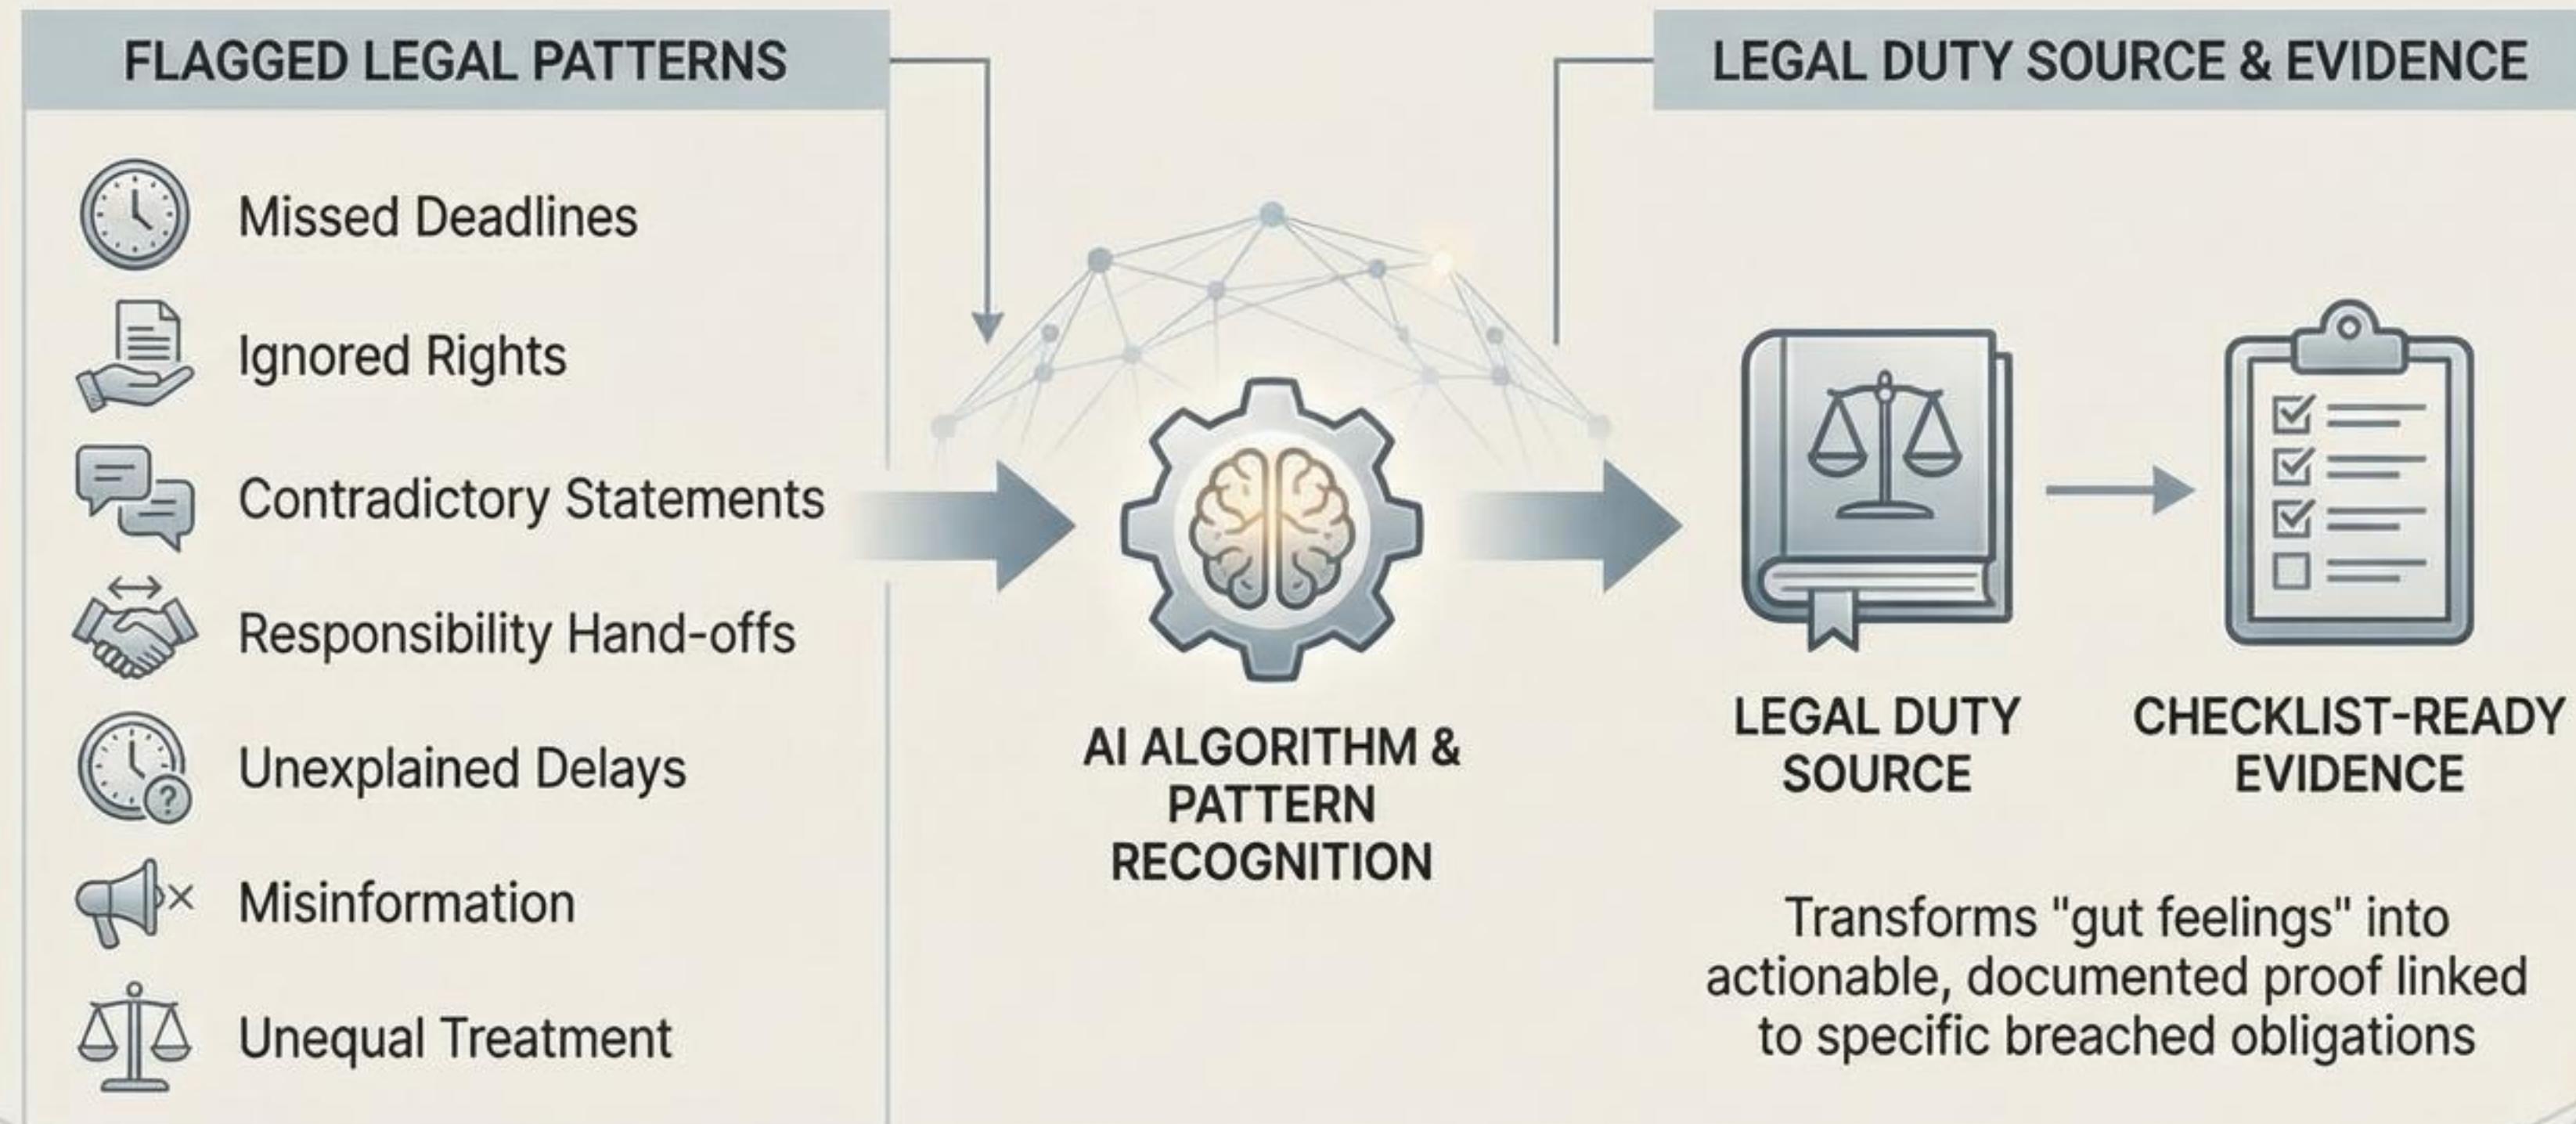

Actionable Legal Insights

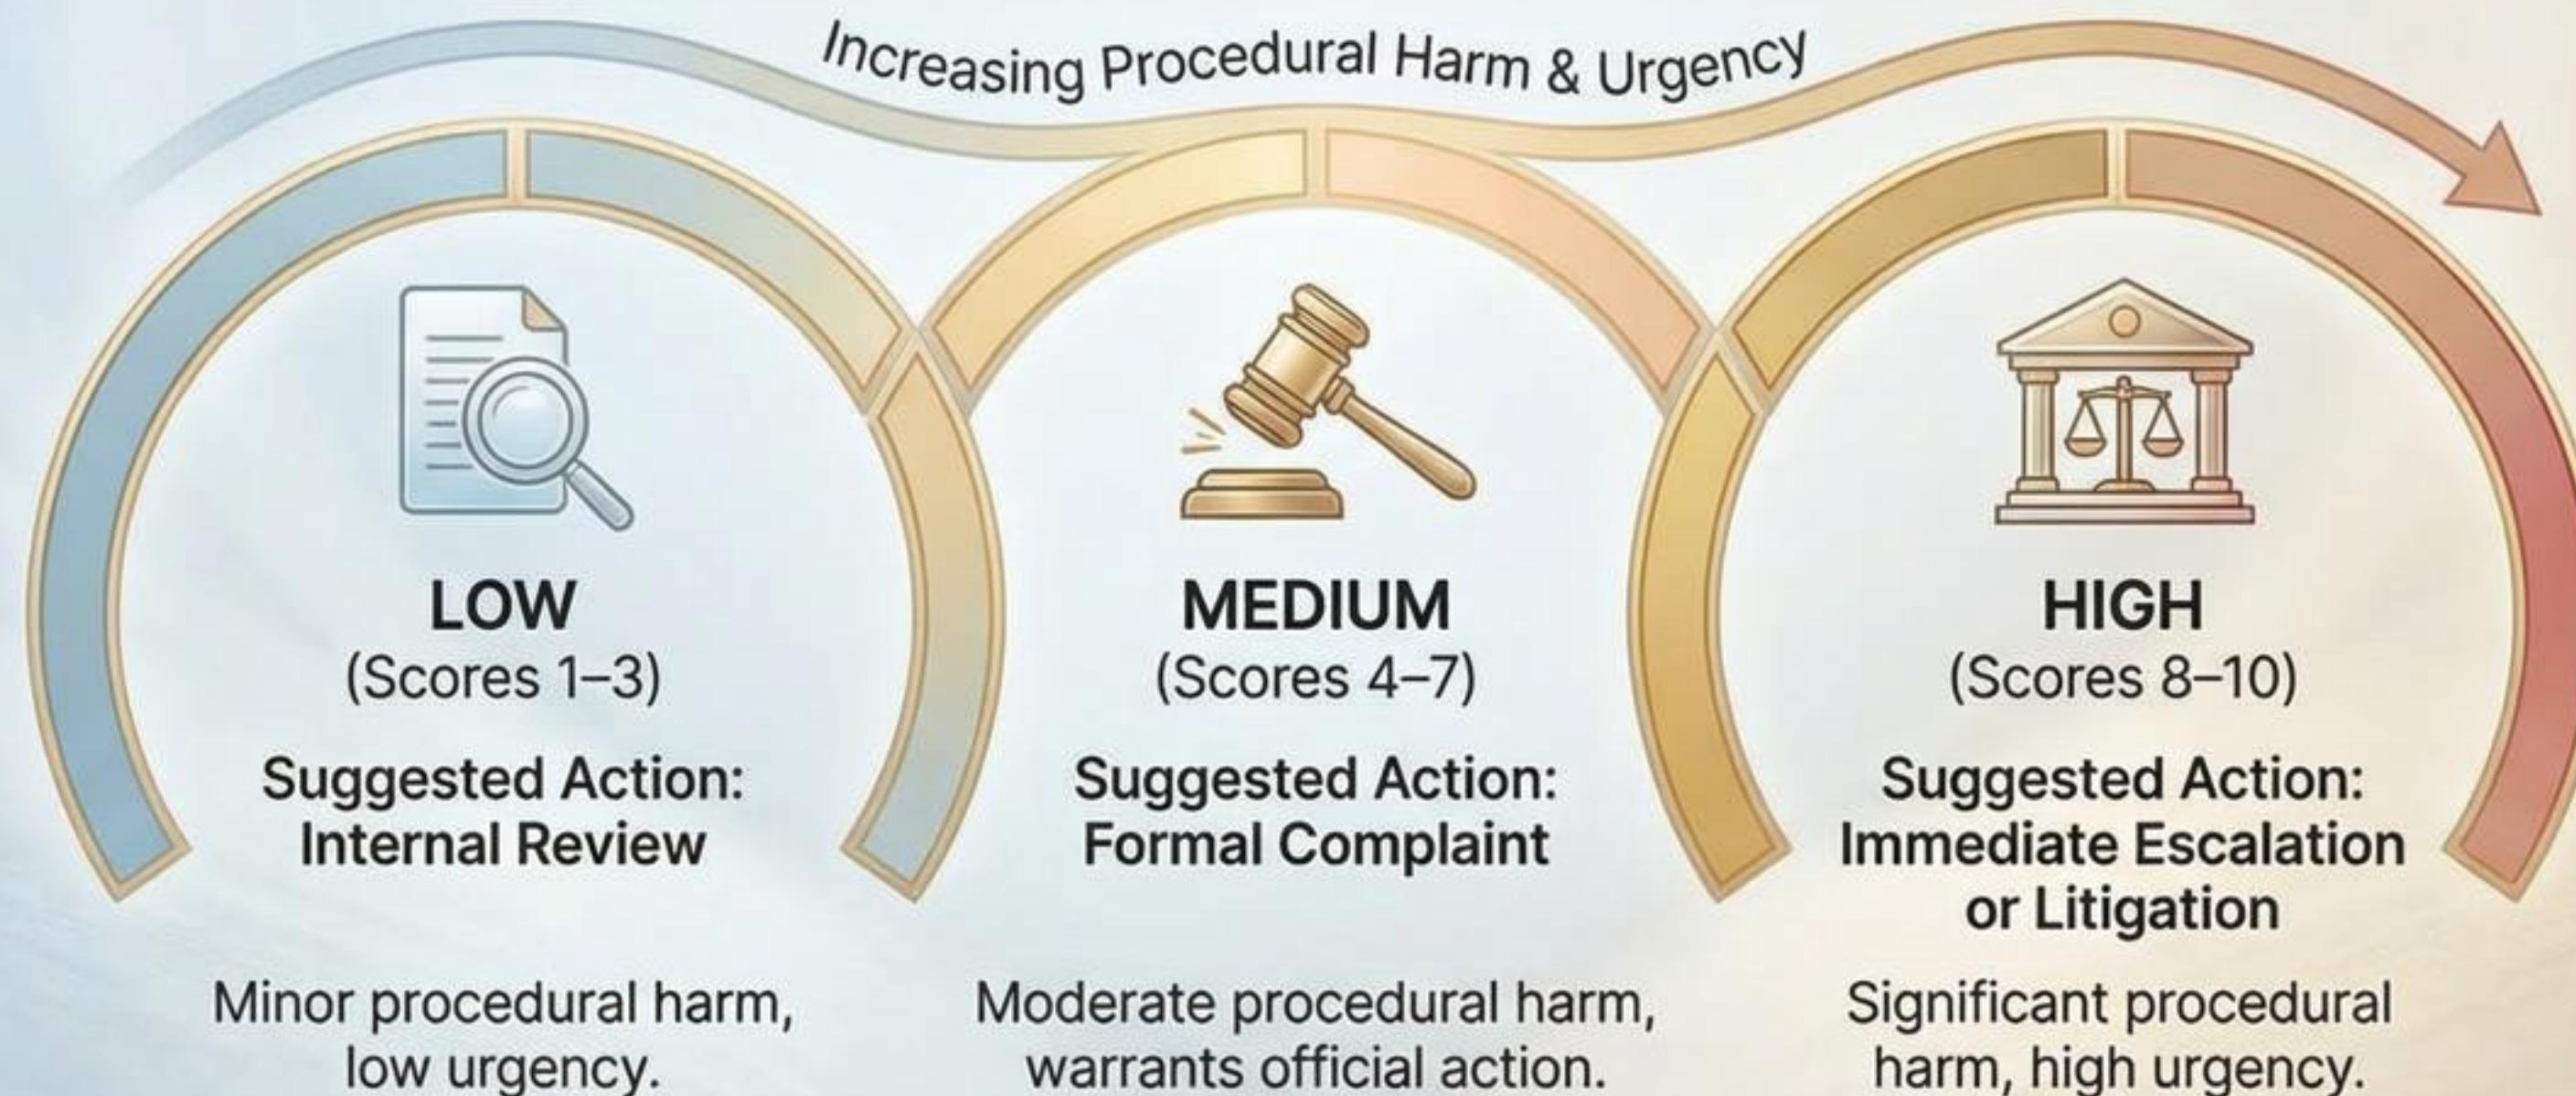

The loop produces quoted extracts, severity labels, and redress options. Gives civilians the same analytical starting point as trained lawyers.

AI-Driven Legal Issue Identification & Evidence Generation

AI-Powered Procedural Harm Scoring: Guiding Legal Urgency

Note: The score reflects objective procedural harm, not emotional hurt, keeping expectations proportional to legal reality.

AI Legal Clarity System: Key Outputs & Concise Dossier

Structured outputs for empowerment and immediate legal action.

(1) Severity Score

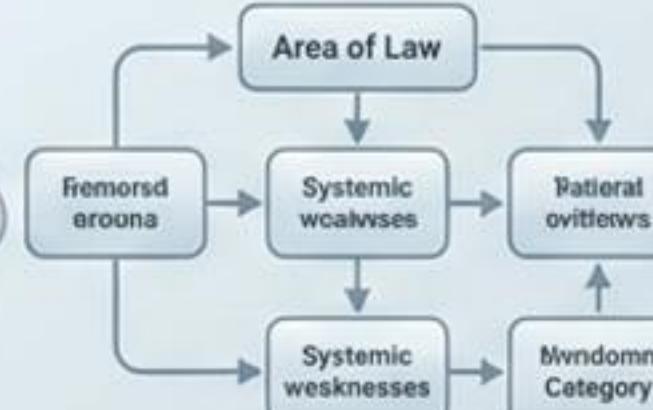

8.5/10

(1) Severity Score

Quantifies the urgency and impact of the legal situation

(2) Breakdown Category

(2) Breakdown Category

Identifies specific systemic issues and legal areas of concern.

(3) Verbatim Evidence Extracts

(3) Verbatim Evidence Extracts

Includes direct quotes and page numbers from source materials.

(4) Redress Insight

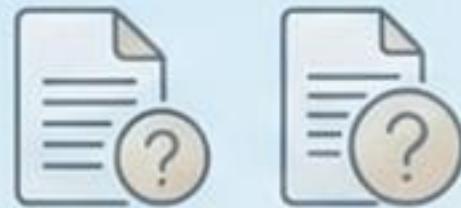

(4) Redress Insight

Lists practical, next-step recommendations and resolution options.

These four items form a concise, ready-to-use dossier for attachment to complaint forms, advocate briefs, or pre-action letters without extra editing.

Crucial Disclaimers & User Responsibilities

Informational Aid, Not Legal Advice

- Truthfarian is for clarity and understanding, not a substitute for professional legal counsel.

User Responsibility

- Double-check all deadlines, jurisdiction, and facts independently before acting.

Privacy & Anonymity

- No personal names or case numbers ever leave your device.

Human Diligence

- Amplifies lay clarity but preserves the ultimate need for human judgment and diligence.

Keeping responsibility where it legally belongs.

Real-World Scenario: Tenant vs. Landlord Resolution

1. Tenant Action (Input)

Tenant uploads email chains & photos of leaking ceiling.

2. AI Analysis & Insights

AI identifies key issues, legal obligations, & timeline.

3. AI Output (Actionable)

Drafts professional letter requesting compensation & repair schedule.

4. Outcome (Resolution)

Tenant submits via council portal. Issue resolved swiftly.

AI-Powered Legal Actionable Workflow: 4-Step Process

Transforming Algorithmic Clarity into Executable Momentum without Procedural Paralysis

Step 1: DECIDE

Assess Score & Justify Action

- Review AI-generated assessment score.
- Determine if legal action is warranted.
- Compare against thresholds.

Step 2: DRAFT

Draft Complaint with AI Insights

- Utilize extracted key points and relevant legal extracts.
- Integrate redress insights for a strong foundation.
- Structure the formal complaint.

Step 3: DELIVER

Submit through Appropriate Channels

- Identify the specific channel cited in the breakdown.
- Ensure secure delivery via designated platform.
- Follow procedural submission guidelines.

Step 4: DONE

Store Record for Future Appeals

- Securely save the generated PDF record.
- Maintain a comprehensive case file.
- Prepare for potential future actions or appeals.
